NURSERY (9 months +) D.O.B 01/09/25 to 31/08/26

## Inclusion Fund Descriptor

Description of need - this description should be read in its entirety and consideration given as to if this described a ‘best fit’ for the child’s needs

- Needs likely to be permanent and lifelong due to nature of disability
- Complex medical needs, persistent and require extensive multi agency response
- Totally reliant on adults for complex needs to be met e.g.  daily medical complexities with additional complicating factors such as gastrostomy fed, unsafe swallowing, oxygen dependency
- Registered with a severe/profound sight or hearing impairment or dual sensory impairment
- Not yet reaching out
- Not yet showing visual preference
- Limited or restricted response to sensory stimuli
- Does not show awareness of being in novel surroundings
- Not responding to intensive interaction
- Health professionals’ direction is that staff need more than level 3 medication training to meet this child’s needs
- Complex equipment required to meet need

NB Consider if health team have considered funding opportunities
