30 Hours – Linking an eligible child to your Headcount

There are 3 ways you can link a child:

- Complete a 30 Hours check for them and then add them to your headcount
- Add them to your headcount and then search for them in 30 hours checker
- Manually by editing the child's headcount personal details (use this if you have already added them to your headcount and completed a validity check for them but they have not been linked)

If you are claiming using the child's additional 30 hours then we advise completing a 30 hours check before adding them to your headcount.

Complete a 30 Hours check for them and then add them to your headcount

See [Section 3 –New checks \(Completing a check on a child that is not on your headcount\)](#)

Once you have completed a new check for the child, go onto your current headcount task, and click the 'Add Child' button.

SECTION 7 – Temporary Codes

In most circumstances, an eligibility code given to a parent will never change however there are occasions where a parent may be given a temporary code. You will need to also collect the new permanent code from the parent once it has been issued at the next reconfirmation. The temporary code will be valid for 3 to 4 months and then the new permanent code will need to be used. These temporary codes are easy to identify because they begin with 11.
